

A Joint Venture of Ram Mechanical and Steelhead

Date: 03 December 2007

Announcement: Manufacturing and Service Cooperative Business Arrangement

Between the parties:

True Integration Ltd (A Joint Venture of Ram Mechanical Inc. and Steelhead Inc.)
10322 Moursund Blvd.
San Antonio, TX 78221 USA (**True Integration**)
and
Güneş Hidrolik
İmes Sanayi Sitesi E 501 Sokak No 11 34776 Dudullu
Istanbul Turkey (**Günes**).

True Integration Ltd. (Head Office: San Antonio, TX, USA) has agreed to enter a cooperative business arrangement (manufacturing and service) with Gunes Hidrolik (Head Office: Istanbul, Turkey) in the Water Bottling and Beverage Industry. This will include the expansion of the True Integration Ltd. sales office in Istanbul through Vegastar (Ustun Oyman – Managing Director) to assist in overseeing this operation and expansion of the sales and support region to include portions of Europe, Middle East, and other neighbouring countries in 2008.

True Integration Ltd. a global leader in the supply of water bottling and material handling equipment will initially utilize Gunes for international equipment manufacturing (OEM) basis and servicing of such systems abroad. This will initially include robotic (Fanuc Robotics) material handling systems, leak detection and de-capping systems, with possible planned expansion to complete bottling systems including, washers, fillers, cappers, and accessories, and other robotic applications currently being pursued by Ram Mechanical Inc.

Ram Mechanical Inc. an exclusive Fanuc Robotic Integrator for North America for water bottling rack loading and palletizing will be supplying Fanuc Robotic Systems from Fanuc North America directly to Gunes Hidrolik; these robots will be fully warrantied and supported by Fanuc globally through True Integration Ltd. and Ram Mechanical Inc. a licensed integrator of Fanuc. This will also include the full support from Ram Mechanical Europe Ltd. (Head Office: Stirling, Scotland; Dr. Andrew Peacock, Managing Director) who will be managing European operations for True Integration Ltd.

The agreement will not only enable True Integration to source product manufacturing and service to Gunes, but also exchange technology, to cross-license patents, and to develop new products on a cooperative basis. This agreement will not only improve True Integrations ability to provide competitive products and service abroad, but by working effectively together, the two companies will further broaden their product portfolios, all enhancing customer satisfaction in the global water bottling, beverage, and material handling industry.
